

CLOSED SIFTER TYPE SD-3

The VIB sifter type SD-3 with 3 screen decks is designed for sorting and dedusting of e.g., Pellets and Granulate.

The sifter type SD-3 is mostly used for sorting of wood- and foodstuff pellets, saw shavings and other sorting purposes.

VIB sifters are sustainable and always designed for high yield with focus on:

- High operational safety levels
- Non-product contamination
- Accessible for easy cleaning inside
- Accessible for easy cleaning outside
- Reduction of dust
- Low energy consumption
- Screen size related to design capacity.
- Low maintenance

The sifter can be acquired in sizes between 0,16 and 6m².

The VIB sifter type SD-3 is available:

In an open or a closed version

In a customized made design

In a various design for inspection

With round or rectangular in- and outlets

With ball decks

With two motor vibrators

With linear vibrations
