

OPEN CONVEYOR TYPE C

The VIB conveyor is mostly designed in a customized version adapted to customer's layout.

The C vibrating conveyor with two motor vibrators is designed for conveying of all kind of product, except very sticky products.

The conveyor is used in the Food, Foodstuff, Building, Recycling, Mining, and the Chemical Industry.

VIB vibrating Conveyors are sustainable and always designed for high yield with focus on:

- High operational safety levels
- Low maintenance
- Easy for cleaning
- Non product contamination
- Reduction of dust
- Most durable wear plates
- Low energy consumption
- Conveyor size related to capacity.

The VIB Conveyor type C is available:

With hydraulic dampers

With all kind of European motor vibrators

With 2, 4, 6 or 8 pole motor vibrators

Demount able wear steel plates or linings

With linear vibrations

With ATEX motor vibrators

In a product heated or cooled version

With pneumatic slide gate

With an outlet screen / wedge wire screen

In a low noise version with special bottom

With tray increased or with slope

With steering / frequency inverter
