

OPEN FEEDER TYPE F

The VIB Feeder is mostly designed in a customized version adapted to customer's layout.

The F vibrating Feeder with two motor vibrators is designed for conveying of all kind of product, except very sticky products.

The Feeder is used in the Food, Foodstuff, Building, Recycling, Mining, and the Chemical Industry.

VIB Vibrating Feeders are sustainable and always designed for high yield with focus on:

- High operational safety levels
- Low maintenance
- Easy for cleaning
- Non product contamination
- Reduction of dust
- Most durable wear plates
- Low energy consumption
- Feeder size related to capacity.

The VIB Feeder type F is available:
